## COURSE DESCRIPTION:

STATA is a command driven, integrated software package for data manipulation, visualization, statistical analysis and reporting. This offline course mainly focuses on hands-on training in STATA software along with some basic concepts in biostatistics. The sessions will have presentation followed by demonstrations by the resource persons and facilitators. The participants will be provided with exercises for practice followed by discussion and clarification of doubts.

## WORKSHOP CONTENT:

- ♦ Introduction to STATA software and loading the data
- ♦ Working with do. files
- ♦ Structure of STATA commands
- ♦ Describing the data
- ♦ Restructuring the data
- ♦ Choice of statistical tests
- ♦ Plotting the basic graphs
- ♦ Introduction to linear and logistic regression
- ♦ Diagnostic test and ROC curve
