- To expose the participants to the process of writing research proposals and the funding environment.

About College

Yenepoya Pharmacy College & Research Centre is the new College of Pharmacy started in the academic year (2017-2018) under Yenepoya (Deemed to be University), Mangalore, Karnataka. Yenepoya, which is the first private University in the District of Dakshina Kannada launched in 2008 under UGC section 3A. The university is accredited with NAAC, Grade "A+" 3rd best youngest university in the state in 2019, and secured 85th position in NIRF ranking in 2022. The university runs various health profession colleges like Medical, Dental Nursing, Physiotherapy, Homeopathy, Ayurveda, and Naturopathy colleges along with Pharmacy colleges. Presently, we are running B. Pharm, D. Pharm, Pharm D & M. Pharm programs. Further, the university's Ph.D. centers around 26 candidates are pursuing a Ph.D. under the Faculty of Pharmacy (FOP).

About Program

The research methods and techniques dealt with in the Two-Day National level Workshop on Research Methodology (24th April & 25th April 2024) cover quantitative and qualitative approaches in scientific research. Quantitative methods aim to classify features, count them, and create statistical models to test hypotheses and explain observations. Qualitative methods aim for a complete, detailed description of observations, including the context of events and circumstances. An experiment is a research method for investigating cause and effect under highly controlled conditions. When experimenting, researchers will test a hypothesis, which is a statement of how two or more variables are related. A survey is research that targets some population, which are the people who are the focus of research. The workshop aims to improve the research skills and competence among the researchers by strengthening their knowledge and improving the researcher's technical writing skills, etc.

Resource Person

The resource persons/ experts are prominent professors and scholars in the field of research, statistics, and data science with excellent knowledge of Research and various software. They have extensive experience in Research applications and statistical tools in data analysis.

Aim

The workshop aims to impart knowledge and address various obstacles in research via a combination of interactive lectures, discussions, and a hands-on approach blended with real-life examples. Upon completion of the workshop, the participants will have knowledge of different study designs, develop hypotheses, research questions, and objectives, identify sample size and sampling techniques, understand to analyze the data, research publication and thesis writing strategies, etc.
