

Certificate Course in Implantology – Advance Level

6th to 8th of November 2023.

The 2nd Module of Advance Implantology Course was an advance surgical module where the participants were trained in digital planning for a completely edentulous patient using the DTX studio Software, given a live demo of Implant placement for full arch restoration using the All-on-4 Concept and an immediate loading protocol demonstrated using the denture conversion. The participants also placed implants for their completely edentulous patient and loaded them immediately using the All-on-4 concept.

The course faculty were Dr Anjan Shah Oral Surgeon and Dr Hasan Sarfaraz.

The Advance course is 3 module course the next module is the Advance prosthetic module where these case will be provided with a definitive Implant retained prosthesis
